Red Rose DHIA Directors Set Banquet Date For January 17th

At their quarterly board meeting, directors of the Red Rose Dairy Herd Improvement Association designated January 17 as the date for the next annual banquet meeting, and selected the Dutch Town & Country Inn, Vintage, as the site.

Meeting in the Livestock Exchange Room at the Union Stock Yards, Lancaster, on Monday night, directors discussed plans for the upcoming annual event. Several possible speakers were suggested by program committee chairman Jay Garber, but no final decision was reached by board members

SIX DIRECTORS' TERMS EXPIRE

Association president Robert Breneman announced that the terms of six of the directors would expire this year, and that nominations should be presented for a membership vote in December. Names of the new directors will be announced at the annual meeting.

Retiring directors, who are not eligible to succeed themselves, are: Association 2, Kenneth Shoemaker, Kirkwood R1; Association 5, Curt Akers, Quarryville R1; Association 8, Robert Breneman, Strasburg R1; Association 11, Dieter Lande, Oxford R1; Association 14, Samuel Kreider, Quarryville R1; and Association 16, Harry M. Breneman, Quarryville R2

Three names will be presented for each association by the

Beef Club Prepares For County Roundup, District Show & Sale

Lancaster County agent M M. Smith reminded 4-H Baby Beef Club members this week that the County Baby Beef Roundup will be held on Tuesday, December 6, at the Lancaster Stock Yards.

Steers should be brought to the Stock Yards between 8 and 11 o'clock Tuesday morning, Smith said At 1 p.m., steers to go to the Farm Show in January will be selected, tagged and weighed. The county quota for Farm Show steers this year will probably be 33

Holstein Assn. Announces Type Scoring Changes

The type scoring program for measuring the conformation of registered Holsteins will receive its first major change in nearly 40 years in January Holstein staff classifiers will be adding descriptive information to their reports of herd visits, according to the Holstein Friesian Association of America

(Continued on Page 12)

Complaints Slow Plans For Egg Grade Change

NEW YORK — Because of complaints from numerous dealers, Urner-Barry Publications has postponed from Nov 14 until next Feb 20 its plan for a spot quotation reflecting the wholesale value of extra large white eggs

The decision by the price reporting firm was reached after cartoners and wholesalers charged that such a quotation would cause major marketing inconveniences.

In announcing the postponement, the Urner-Barry editors stated that "we still hold the opinion that the volume of extra large eggs moving through the regular trade channels justifies a clearly defined market quotation on this grade, just as carried on large, mediums and pullets"

Over the next three months, the editors said they will check

Pa. SWCD Directors Call For Farm-Land Tax Break

At the 19th annual conference of the State Soil & Water Conservation Commission and the Pennsylvania Association of Soil and Water Conservation District Directors, Inc, held last week at Lewistown, further support was added for the cause of changing the state's taxing system on agricultural land

The conservation directors passed a resolution supporting a tax break under state law for land retained in the production of agricultural crops as long as the land is used entirely for that purpose. The resolution will go to the SWCD legislative committee which will then try to get an appropriate state law passed.

The directors expressed concern that the increased pressures of urban development and industrial expansion on good agricultural land were in direct opposition to the need for continued food production. They also felt that preservation of open spaces could best preserve Pennsylvania's natural beauty Their tax-break proposal was designed to relieve these combined pressures.

In a panel discussion moderated by Amos H. Funk, Millersville R1, Ralph W. Hunter told the conservationists that only 11 percent of the potential land in Pennsylvania is under approved conservation practices. Hunter, program specialist for the State Soil & Water Conservation Commission, also stated that, on the average, only 36 percent of the practices planned for any particular farm are ever actually applied.

Another panelist, Elmer Sen-

Increased Need For Vocational Agriculture Teachers Predicted

The new vocational agriculture program faces a critical shortage of teachers, according to Dr Ralph Barwick associate professor of agriculture education at the University of Delaware The number of new teaching positions will increase by nearly 25 percent in the next three years but the number of students majoring in agricultural education has decreased by ten percent in the past five years

Vocational agriculture is an increasingly important field, Barwick points out. Agriculture today is a highly technical business that requires extensive training and a continuing education in production, management, marketing and financing. The new Vocational Education Act makes programs possible to train people for

THEY GROW 'EM BIG IN LANCASTER COUNTY

THE AMERICAN INDIANS sure knew what they were doing when they raised pumpkins with their Indian corn, but we doubt they ever grew any the size of these beauties. This random group of golden big ones, seen recently on the Thomas Farm at Lititz R3, have since reached the end of "Pumpkin Lane" as Jack-O-Lanterns, or, more recently, as pumpkin pie. L. F. Photo

Weather

More warm weather is in store for the next five days, the weatherman says. Temperatures are expected to average above the normal range of 47 to 30 degrees. The coolest part of the period will be over the weekend, with some moderation beginning thereafter.

Little precipitation is in sight for the period, with less than 1/10 inch forecast about mid-week.

MARKET NEWS REPORT

Less Moo, More Milk On Pa. Farms, But Total Production Lags

HARRISBURG — Dairy cow numbers in the state declined again in October—for the 24th consecutive month—while milk production dropped 1 2 percent below last year's level, according to the Pennsylvania Crop Reporting Service

The number of cows on Pennsylvania dairy farms last month was estimated at 740,-000, down 2,000 from a month earlier, and 36,000 less than in October 1965

The last increase occurred five years ago, in October 1961, according to Crop Reporting records That month 880,000 cows were reported on state farms, 1,000 more than in September

Two years ago, in September 1964, the state counted 880,000 cows on its farms, the same number reported in the previous month. That decline has been uninterrupted since then

Production per cow rose to a record October high last month, 715 pounds of milk That was 25 pounds more than in October last year and 104 pounds above the 1960-64 average

Total milk production, however, declined in the state with October volume reported as 548 million pounds, seven million pounds less than a year earlier.

Since the beginning of the year, Pennsylvania milk production totaled 5,818 million pounds, 90 million pounds—almost 42 million quarts—less than last year

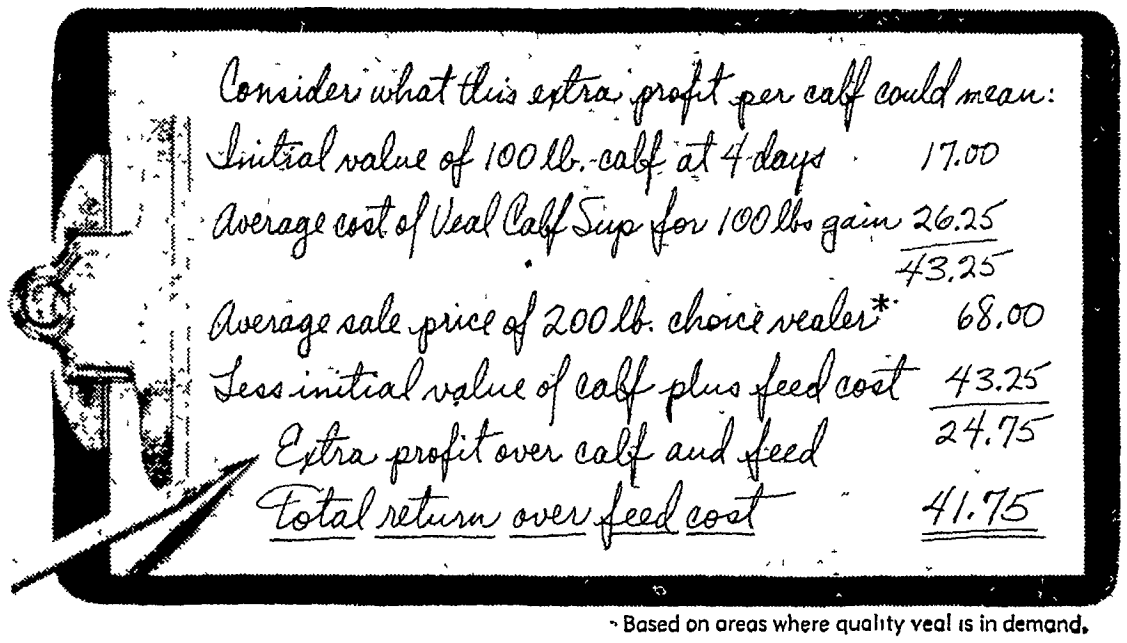
Sell Your Surplus Dairy Calves As Profitable Vealers

New Ful-O-Pep Veal Calf Sup makes veal feeding practical



Consider what this extra profit per calf could mean:
Initial value of 100 lb. calf at 4 days 17.00
Average cost of Veal Calf Sup for 100 lbs gain 26.25
43.25
Average sale price of 200 lb. choice vealer* 68.00
Less initial value of calf plus feed cost 43.25
Extra profit over calf and feed 24.75
Total return over feed cost 41.75

* Based on areas where quality veal is in demand.

Don't sell your surplus calves at sacrifice prices

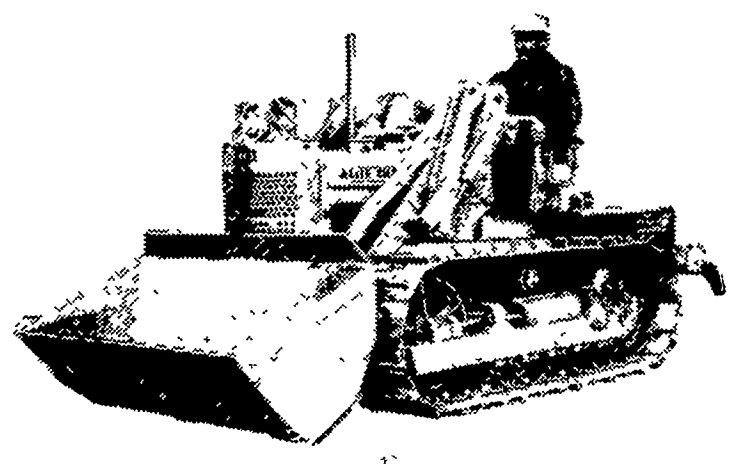
SHUTTLE CLUTCH MAGIC MEANS EXTRA PROFIT!



Watch this Allis-Chalmers crawler and ⅞-yard loader move in fast, pick up a big bite of material, and move out fast to load the truck, cutting seconds from every work cycle.

SHUTTLE clutch magic lets you reverse direction without foot clutching or gear shifting. You simply move a lever forward and back. And the **SHUTTLE clutch** is just one of the many benefits that make the H-3 and HD-3 the most profitable compact crawlers in the 6,000-lb class.

You also get independent control of steering clutches and brakes; "live" hydraulic systems; box-type, all-steel main frame; long, rugged track assembly; and gasoline or diesel power. Let us give you the facts!

From Where We Stand . . .

The Best $2 Buy In Town

Your membership in the Lancaster County Poultry Association could be the best buy you will ever make at $2, and yet only about eight percent of the county's 713 commercial poultrymen have so far had the foresight to take advantage of it.

Income from poultry in the county ranks second only to dairy, and our county ranks at, or very near, the top in the nation for poultry income.

The days when a poultry association served primarily as a focal point for social activities are gone, although that is still one important function. But now, with fewer and larger poultry operations, a local association is a necessity for economic reasons. First of all, your local organization has a direct pipeline to its state affiliate, and the state to the regional, and the several regional associations working together can literally move mountains when it comes to getting favorable legislation passed, or unfavorable legislation tabled.

But the key to success for state and regional poultry associations is held by you, at the local level. If individual county associations are strong, then, collectively, they will be even stronger. If the county associations are weak, and lack popular support, then the state and regional organizations are all built on sand, and destined only for eventual erosion. This would certainly be the poultrymen's loss.

At the recent banquet meeting of the Lancaster County Poultry Association, Walter Wheelock, vice president of the state affiliate, reported that membership at the state level had dropped from 8000 in 1937 to 566 this year. According to the latest census figures, there are 4654 commercial poultry farms in Pennsylvania. A little arithmetic shows that only 12 percent of Pennsylvania poultrymen actively support their state commodity association.

This is not only disgraceful it is downright dangerous. It means that 12 percent of the poultrymen, or probably somewhat less, are making decisions that concern the possible livlihood, present and future, for the 88 percent who are not members!

An example of how this can affect you directly was reflected in a poll conducted last year by the Northeastern Poultry Producers Council (NEPPCO). NEPPCO asked individual poultrymen and state poultry associations in the 14 northeastern states for their opinions on a nationwide marketing order for table eggs. Eighty-five percent of the poultrymen said they opposed such controls. Two of the state associations, New Jersey and Connecticut, however, favored such control legislation Did those two associations reflect the wishes of their state's poultrymen? They did not. Individual poultrymen in Connecticut voted 87 percent against controls, while 61 percent of New Jersey poultrymen did likewise.

That was just a poll, not the real thing. But it surely illustrates the importance of a state association — whether it's poultry, dairy, swine, or any other farm commodity group — being able to accurately express the wishes of its individual members. But, of course, there's the problem. If there aren't sufficient members supporting the state organization how can it truly reflect popular opinion?

Coming back to the county level, the picture gets even muddier. Membership chairman Jack Huber reported at the annual meeting that only some 60 countians paid their dues for the coming year (this is traditionally done at the annual banquet). Total membership last year was 94. That certainly does not indicate very widespread support for the county's poultry association. And yet approximately 300 persons attend the annual banquet each year.

Why is it so hard for Lancaster County's progressive poultrymen to recognize the need to band together with others of similar economic interests? Businessmen in other industries have deemed this a necessity for years, and have been well rewarded for their efforts.

Assuming that 50 percent of the industry would be a reasonable membership to expect in a commodity organization, Lancaster County Poultry Association should have a minimum of 350 members.

If the poultry business is an important part of your operation why not invest $2 in the future of your industry today? Join the Lancaster County Poultry Association now. Support it, and it will support you. Where else can you get a better buy than this for $2 — or at any price?

★ ★ ★ ★

Deer Outlook, Dandy!

According to the Pennsylvania Game Commission, this year promises to be one of the best of all time for deer hunters. Conditions this year should produce a deer harvest as good as last year's record kill of 64,129.

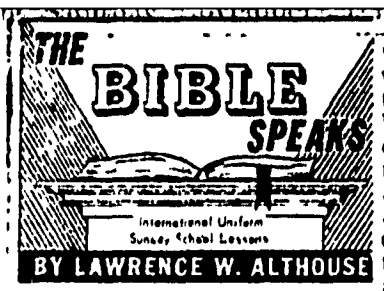
Of Pennsylvania's estimated 650,000 deer population, the Commission says there may be 90,000 antlered bucks available for hunters when the season opens Monday.

Deer are less concentrated in certain areas of the state this year, it is claimed, making hunters' chances as good in one place as another.

The Commission reminds hunters that only one deer is the legal limit in the state, and that the daily hunting hours are 7 a.m. to 5 p.m. To be a legal target during the antlered season, a deer must have a rack with two or more points to one antler, or have one antler at least three or more inches long. The two-week season will end on December 10, but a statewide antlerless deer season will be open December 12 and 13.

Just a thought — if you don't get this week's Lancaster Farming read before you take to the hills, why not pack it in with your hunting gear and take it along? You'll find it reads just as well in the woods as on the farm.

Good Hunting!



Is There Any Hope?

Lesson For November 27, 1966

Background Scripture Jeremiah 31 37

Devotional Reading Jeremiah 31 1 16

Several years ago an American submarine was trapped with its entire crew far below the surface of the ocean. At first it was believed that rescue attempts had a good chance for success. Messages were tapped out on the hull of the stricken sub, establishing contact between those above and below. Despite heroic efforts to rescue the crew time finally ran out. With oxygen failing, someone tapped out a last desperate question. "Is there any hope?"

Rev. Althouse

Many today are preoccupied with that question. They look at the pain, the evil, and the turmoil of this complex world today and want some assurance of what the future holds. What kind of world will it be for our children and their children? Will they still stand under the threat of nuclear destruction, under the tension of racial hostilities, under the danger of growing world Communism?

Signs Of The Times

When we read the signs of the times it is difficult to decide which way they are pointing. Every hope seems balanced by some threat, every stride forward by a big step backward, every indication of encouragement by mounting pressures of dispair. Commencement speakers and politicians delight in forseeing a 'bright new day' before us, but is that really what lies ahead?

Some people are saying, "Stop worrying and leave it up to man — he'll bring a brighter day!' Never before has man had so much about which to be optimistic with himself. His progress in science and technology are unbelievable. Is there no limit to Man's potentialities? There is: Man himself.

When the First World War was fought, many believed that they were fighting a "war to end all wars." In the interval between the First and Second World Wars people were supremely optimistic about the ability of man to build a world free of armed conflict. Education, science and culture would eliminate the causes of warfare. Given enough time and motivation, there wasn't anything man couldn't do.

The Nagging Question

Education, science, and culture did expand and grow at an amazing pace, but so did the causes of war. Mankind's great and optimistic hopes for the future were dashed by the even more terrible World War Two.

Now, once again we are envisioning the paradise of the world that is "just around the corner." The growth of science, culture, and education is far greater than ever before. Once again people are predicting a not-too-distant Utopia: life, push-buttoned to the hilt; life created in the laboratory test tube; humanity molded into new forms for the management of human ease!

Because many of us remember the disappointments of the past, we find ourselves asking that nagging question: "Is there any hope?" The present can't be endured when we have some assurance of the future Yet the past seems to fairly bellow 'Don't count on man!"

In the dark days when Judah was under seige by Babylon, the people of Judah asked that nagging question of the prophet Jeremiah. Instead of telling them, he showed them. Buying a piece of real estate outside Jerusalem, Jeremiah demonstrated in a very tangible way that he believed God would restore Judah.

This man whom many regarded as the "prophet of doom," actually held the most optimistic outlook. But it was an optimism, not about man, but the power of God.

Do you believe in the future? No, let us not believe in the future but in the God in whose hands the future rests. Is there any hope? Yes, but in God, not man

ATTEND THE CHURCH OF YOUR CHOICE SUNDAY

Now Is The Time . . .

By Max Smith, Lancaster County Agent

SMITH

To Inspect Fire Extinguishers

Every barn should have one or more fire extinguishers, also, every farmstead operator should be certain all members of the family know how to operate the extinguisher, the winter season presents more fire hazards and greater risks in case of fire All farmers are urged to be well prepared for any fire emergency, a few minutes can mean the difference between a major fire and successful preventive measures.

To Clean Out Downspouts

Eaves, troughs, and downspouts blocked with leaves or other trash can cause water to back up under the grooves of buildings and cause considerable damage A few minutes on the ladder at this time of the season may prevent serious real estate damage.

To Eliminate Livestock Parasites

Lower cost of production should be one objective of every livestock producer, one of the major items in this effort is to be sure that all animals are free of both internal and external parasites. Fecal samples of the manure can be taken to the local veterinarian to learn of internal parasites; then chemicals may be administered to kill the stomach worms Body lice may be controlled by a number of dusts or sprays to get animal comfort Infected animals will not produce efficiently.

elect association officers for 1967

Raymond and Louise Witmer, Willow Street R1, were presented with a trophy in recognition of the top production record made by their dairy herd in the past year The Witmers had a herd average of 12,058 pounds of milk and 605 pounds of butter fat

Lifetime production awards were presented to Jesse Balmer, Lititz R4, for high-producing cow — 129,245 pounds, of milk, and to Harry S Mumma, Manheim R1, for high butterfat production—5,780 pounds

High lactation awards went to Witmer for a two-year-old; K D and Elsie Linde, Oxford R1, and Witmer, for three-year-olds; to Lindes for a four-year-old; and to Mumma, for a butterfat record by a four-year-old

The 93 members and guests at the banquet heard committee reports from Rohrer Witmer on the 1966 field day, from John Breneman on the Future Farmers of America calf award; and from Garber on the Dairy Herd Improvement Association.

The featured speaker for the evening was Don Spatz, a radio personality

E'town FFA Chapter Initiates Greenhands

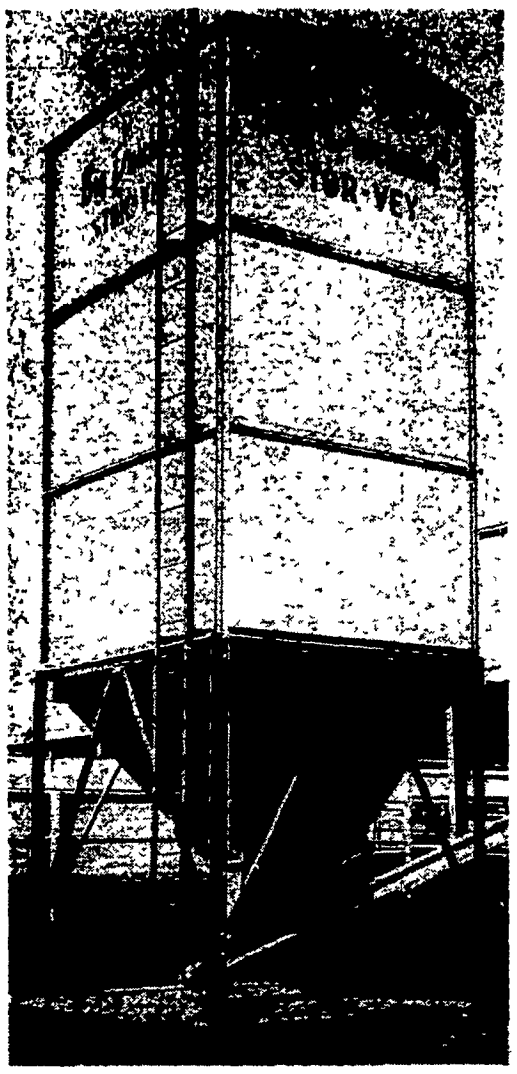
The Elizabethtown Chapter of the Future Farmers of America initiated twelve "Greenhands" into the chapter last Thursday at the Elizabethtown Area High School

The new members were Larry Baum, Eugene Auker, Mike Baum, Dana Brown, Bruce and Ralph Kauffman, Walter Redcay, William Brady, and Robert Smeal.

Five Chapter Farmers were also initiated into the chapter: Robert Becker, Lester Guttschall, Gerald Heistand, Paul Swanger, and Mel Zimmerman

Following the initiations, Lampeter Fair judging awards were presented to winners The highest award, a $25 Savings Bond, was presented to John Seitz by the Elizabethtown Kiwanis Club.

MR. DAIRYMAN: WE HAVE



AUTOMATIC DAIRY FEEDING SYSTEMS

No Feed Bridging — Packing or Jamming With Big Dutchman STOR-VEY System

Now! You can STORe, conVEY and Feed Automatically . . . directly to any type milking parlor . . . with a Big Dutchman STOR-VEY automatic dairy feeding system. STOR-VEY bin assures a continuous flow of feed . . . Chain-in-Trough conveys feed quietly around 45°, 90° and even 180° corners . . . Electric Proportioners meter out feed accurately. Big Dutchman STOR-VEY dairy feeding systems also offer new flexibility and efficiency for . . . Stanchion Parlors, Stanchion Barns or Milking Barns. Quiet, economical and trouble-free . . . the STOR-VEY system assures your cows of all the fresh feed they can eat automatically or in regulated amounts. Let us show you how a Big Dutchman system will fit your dairy operation. (SEE OUR ADV. IN "HOARD'S DAIRYMAN")

● 4-H Conference

(Continued from Page 1)

ceived a trophy for winning the fitting championship at the County Dairy Roundup held last August.

Other state 4-H'ers attending the dairy conference are: Peggy Wollaston, Toughkenamon; Linda Ballard, Troy R3; Seka Elyash, Mars R1; David Lee English, Meadville R4; Wayne Koontz, Bedford R4; and Mary Sue Marburger, Evans City R2.

Selection of these members was made on the basis of scores received in the 4-H National Awards Contest, and the winning dairy demonstration team at State 4-H Days in August.

The conference, which will be held in the Conrad Hilton Hotel, will stress recognition, inspiration, education, and career exploration as related to all phases of the dairy industry.

Serving as chaperones for the 4-H members will be Mrs. Herbert Royer, Lancaster; Charles Wollaston, Toughkenamon; and James A. Weiler, assistant Bedford County agent.

● DHIA

(Continued from Page 1)

outgoing director and the supervisor.

OWNER-SAMPLER ELIGIBILITY

The question of voting eligibility of owner-sampler members was discussed, but the directors were informed by association adviser Victor Plastow that their eligibility could only be accomplished by a change in the by-laws Head tester Wilbur Houser informed the board that there were presently 325 DHIA herds and 300 owner-sampler herds under the testing program.

The southeastern Pennsylvania District DHIA directors' meeting will be hosted by Lancaster County this year, Plastow told the board. This all-day conference will be held in March, and will involve about 60 persons. The president appointed directors Melvin Groff and Raymond Hoover to find a place to hold the district meeting.

Plastow announced that four association testers would be eligible for plaques to be awarded at the district conference, and Brenèman appointed I. Eby Hostetter as committee chairman to work up applications for the award by December 16.

At the last testers' meeting, Wilbur Houser stated, the supervisors had suggested making the association annual report available to owner-sampler herds free of charge Houser also reported he had secured three bids for printing the report

The board voted to leave selection of a printer to Houser, and decided to have enough copies of the report printed to distribute copies to owner-sampler members.

Houser reported that a tester in the eastern end of the county, Larry Twigg, had resigned, and that his replacement was Clifford Bender. The effective date of the personnel change was November 10, Houser said.

MORE MILKING PARLORS

In other business, Houser told the board that the steady increase in numbers of milking parlors in the area had created greater demand for use of the association's milk-o-meter equipment. At an earlier meeting, directors had voted to hold off adding more milk-o-meters in anticipation of an improved metering device appearing on the market. But so far, Houser stated, the National Dairy Herd Improvement Association has not given the new equipment its official approval.

The board voted to approve purchase of a new adding machine for $88 for use by association treasurer Jacob Houser.

Double-barrelled pork builder:

WAYNE PIG BALANCER "400"

Your own grain and Wayne Pig Balancer "400" is a real double-barrelled pork builder for shoats from 50 to 120 lbs. Contains the same outstanding nutrient blend as the famous regular Wayne Pig Balancer (40% protein) but with a high level of a unique antibiotic combination.

Its quality ingredients will balance your pig ration with the amino acids, vitamins and minerals lacking in grain alone. Its high antibiotic level makes it especially valuable for commercial hog lots with chronic disease problems.

You can use Wayne Pig Balancer "400" in either free choice or grind and mix programs. Either way your pigs will hit 120 lbs. quickly and efficiently, ready to finish out profitably.

Come in now and get the complete story on Wayne Pig Balancer "400".

FOR TOP YIELDS OF Hay Pasture Silage

HOFFMAN HPS FORMULAS

HEAVIER YIELDS, greater economy, more dependability, ease of use—these are the four big reasons behind the growing popularity of Hoffman's HPS Formulas for hay, pasture and silage. Each of our 13 special formulas has been compounded to meet specific needs.

There are three major basic types—alfalfa base, clover base and grass base. Each may contain from 4 to 9 different types and varieties to insure best field results. Legumes are pre-inoculated and all formulas are ready to sow. Only top grades of high-germination, clean seed are used . . . blended to produce better stands under adverse conditions.

FARM WOMEN GROUP 3 HOST SOCIETY NO. 13

The Society of Farm Women Group No. 3 entertained 23 members of Society No. 13 recently at a luncheon held in the Social Room of the Salem Lutheran Church, Lincoln.

The women heard Professor J. C. Wine speak on the subject "Mental Health". Wine is moderator at Mohlers Church of the Brethren, a teacher at Millersville State College, and a member of the Board of Directors at Philhaven Hospital.

The program committee in charge of the meeting were: Mrs. Harold S. Stuber, chairman; Mrs. Robert Gregory; Mrs. Harry Palm, Mrs. Willie D. Stober; Miss Linda Stuber; Miss Alva Stuber.

The reception committee consisted of Mrs. Clarence Stauffer and Mrs. Earl L. Miller

In the business session following the luncheon, a commemerative contribution was made to the Ephrata Public Library fund, and a donation to the Tuberculosis Society

Delegates elected to the State Convention of Farm Women Societies to be held in Harrisburg January 9-10 are: Mrs. Ivan Eberly, Mrs. Harvey Gehman, and alternate, Mrs. Robert Gregory.

At the close of the meeting, there were remarks by Mrs. Isaac Koser, president of Group 13.

The next meeting will be a Christmas party for the children of members and a gift and cookie exchange among members. It will be held December 17 at the Emanuel Lutheran Church, Brickerville. Mrs. Elam Shelly will be hostess.

Ober Named ADA District 18 Chairman

J. Russell Ober, Lititz R2, was elected chairman of District 18, American Dairy Assn and Dairy Council of New York, Wednesday at an annual meeting held at Plain and Fancy Farm.

Other officers elected were: John Lesher, Lykens R1, vice chairman; John Krone, Glen Rock R2, secretary; and Russell Cassel, Hummelstown R2, director to the central organization.

Named to the district board of directors were Cassel; Earl Patches, Lebanon County; Fred Martin, Bridge Road, Lancaster and John K. Stoltzfus, Ronks R1.

The question of how we can sell more milk best sums up the major challenges facing today's milk producers, John W. Sliter told the group of milk producers.

Sliter, assistant manager of the dairy farmer organization, said "Milk producers are confronted with five major challenges: misconceptions, diversification, production, costs, and competition. But these all can be combined into one big challenge of finding the way to sell more milk.

"Dairy farming is a business. It's a big business. It's your business, and it needs to be run in a business-like manner. This means using all of the tools available to you to expand your market and increase the demand for your product. It's your job; nobody else is going to do it for you."

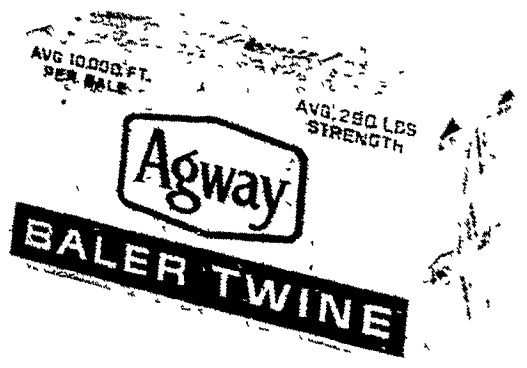
The 35 dairymen from seven Pennsylvania counties attending the meeting are shippers under Federal Order 2.

What Are Farmers Saying About Lancaster Farming?

A hog raiser from around Mount Joy said . . "About two years ago I had about decided to get out of the hog business. Then a friend sent me a sample copy of L. F.; I liked it, and subscribed immediately. I want to tell you I've made more money raising hogs since then than in the five years previous!"

AGWAY TWINE SALE

BALER TWINE
Average Length per lb. — 231'
Average Footage per Carton — 9,000'
Average* Tensile Strength — 325 lbs.
Balls per Carton — 2
Gross* Weight per Carton — 40 lbs.
*at time of manufacture.
Ideal for bales up to 100 pounds. Top-grade, long-strand sisalana fibers spun into uniformly strong, smooth twine that will keep your knotter free of snarls. Rigidly inspected by experts for length, strength, and uniformity of individual strands. No bunches, weak spots or whiskers to cause breaks. Insect, rodent and rot-repellent.



BALER TWINE
Average Length per lb. — 257'
Average Footage per Carton — 10,000'
Average* Tensile Strength — 290 lbs.
Balls per Carton — 2
Gross* Weight per Carton — 40 lbs.
*at time of manufacture.
Economical for bales up to 75 pounds. Designed for light and medium bales of hay. Ideal for use in conjunction with bale throwing. Average number of 36-inch bales per carton about 555. Top-grade, long-strand fibers, spun for uniform strength and smoothness. Treated with insect, rodent, and rot-repellents.

BALER TWINE
Average Length per lb. — 260'
Average Footage Per Carton — 8,000'
Average* Tensile Strength — 240 lbs.
Balls per Carton — 2
Gross* Weight per Carton — 32 lbs.
*at time of manufacture.
The real economy twine for lighter, easier-to-handle bales. Made from carefully selected, high-grade fibers. Precision spun . . . moves freely through needle and knotter . . . ties into tighter, trimmer knots that hold better. Treated with insect, rodent, and rot-repellent. Made in New Orleans by the world's largest manufacturer of agricultural twines.

Imported twine available in 9 and 10 thousand foot bales.

Special Early Order Discount of 10c per bale for all orders received prior to November 30th — regardless of whether twine is taken early winter or next summer.

Reflections

(From the files of Lancaster Farming)

One Year Ago

November, 1965

Poultry Assn. Donates $32,000 To Farm & Home — Paul Hiestand, president of the Lancaster County Poultry Association, presented a check for $32,000 to Levi Brubaker, for the Lancaster County Farm & Home Foundation. Brubaker is co-chairman of the F & H fund drive.

The occasion, attended by 300 Lancaster Countians, was the county poultrymen's annual banquet meeting, held Thursday (Nov. 4) at the Plain & Fancy Farm Restaurant, Bird-in-Hand.

* * * *

County Agent Honored For Service — Lancaster County agricultural agent, M. M. Smith, was one of four agents in the U. S. honored with $250 Animal Science awards at the County Agents National Convention, held this week at Pittsburgh (Nov. 6).

Smith, a county agent for 28 years, was lauded for the successful livestock programs he has developed and administered in the county.

* * * *

Almanac Predicts Rough Winter — Baer's Almanac, in its 141st year of publication at Lancaster, foresees a cold, wet winter for 1965-66. The Almanac sees the entire year of 1966 as a wet one, which may be good news for the drought-stricken Northeast. Heavier snowfalls than usual will accompany January and February, according to the Almanac.

* * * *

County Holsteinmen Elect Stauffer — Clarence Stauffer, formerly vice president of the Lancaster County Holstein Association, was elected to the top job of that 522-member organization last week (Nov. 13) He succeeds retiring president Roy Book, Ronks R1

Robert Groff, Quarryville R3, was named to fill the vice presidency. Completing the executive committee, Daniel Martin, Manheim R1, was returned to his third term as treasurer, Melvin Peifer, Hans Herr Drive, Lancaster, was elected secretary.

Newly elected to three-year-terms as directors were Groff; Mervin Landis, Bird-in-Hand; and Ira Welk, Strasburg R1.

* * * *

Lancaster Farming Completes First Decade—Lancaster Farming, Lancaster County's own farm weekly, completed its first ten years of life this week (Nov. 27).

In November, 1955, a new farm newspaper was born following months of preparation. Named Lancaster Farming, it became the first complete farm newspaper to originate in the East's leading agricultural county in this century.

The paper was adopted by county farmers almost immediately, and from an initial mailing to 28,000 rural boxholders came the nucleus of the paper's present farm subscribers.

* * * *

Kline Elected State Young Farmer Head — Paul B. Kline, Lititz R3, was elected president of the Pennsylvania Young Farmer Association last week (Nov. 20) at the association's annual convention held at Penn State University.

Kline, a steer feeder and poultryman, is also president of the local Manheim YFA Chapter

Another county farmer, Forney Longenecker of Lititz area, was reelected public relations director. Longenecker is also editor of the State YFA newsletter.

Grant Heilman, well-known agricultural photographer from Lititz R3, was awarded an honorary membership in the state association.

Five Years Ago

November, 1961

Lititz Area Girl Wins Capon Roundup — Shirley Hershey, 13-year-old daughter of Mr. and Mrs. Richard Hershey, came up with her second consecutive win in Lancaster County capon competition this week (Nov. 4).

Miss Hershey, a student at Warwick Junior High School, is in her second year of capon club work, and has, therefore, a perfect winning record.

Runnerup in this year's competition was Gary Porter, son of Mr. and Mrs. Edgar Porter of Washington Boro R1.

Judging the annual show, sponsored by the Lancaster Kiwanis Club, was Carl Dossin, poultry extension specialist from Penn State University.

* * * *

County Farm Women Elect — At its 44th annual meeting last Saturday (Nov. 4) at Manheim Central High School, the Lancaster County Society of Farm Women elected Mrs. Kenneth Eshelman, of Conestoga R2, president.

Other officers elected were: 1st vice president, Mrs. Landis Myer, New Holland R1; 2nd vice president, Mrs. Paul Witman, Mount Joy R2; secretary, Mrs. Grayson Cooper, Peach Bottom R2; and treasurer, Mrs. Ammon Huber, Peach Bottom R2.

A total of 368 women, including 53 guests and five state officers, attended the annual county convention.

* * * *

Champ Steer Brings $820 To Countian — Wesley Mast, 17-year-old son of Mr. and Mrs. Jacob K. Mast, Elverson R2, showed a summer yearling Hereford steer to the grand championship of the Eastern National Livestock Exposition at Timonium, Md., on Tuesday (Nov. 14).

At the sale, the 980-pound animal brought $2.25, leaving Mast $820 richer than he was last week.

Mast's sister, Rhoda, was also in contention for grand champion honors with an Angus yearling. She took the reserve title in the junior show.

* * * *

PFA Raps School District Law — Delegates to the annual meeting of the Pennsylvania Farmers' Association in York Wednesday (Nov. 15) approved resolutions opposing the compulsory school district reorganization.

The delegates viewed the reorganization law as a "move toward the ultimate takeover of all school districts" by state or federal government.

It recommended that the law, recently passed by the state legislature, be repealed.

PFA also went on record as favoring the denial of public assistance to persons who refuse "reasonable" job opportunities.

The resolutions were among several adopted at the closing session of the 11th annual meeting at the Hotel York-towne.

* * * *

McSparran, National Grange Treasurer — J. Collins McSparran, the Master of the Pennsylvania State Grange and a former Lancaster County resident, was elected treasurer of the National Grange at a recent meeting in Worcester, Mass.

* * * *

New Holland YFA To Organize — The first meeting of the New Holland Young and Adult Farmer classes is scheduled for Nov. 28 at Garden Spot High School. The subject for discussion and demonstration for the first class will be Farm Tractor Maintenance.

Agriculture instructors Robert Herr and Eugene Daugherty noted that all interested farmers in the New Holland area are invited to attend these winter classes which will be under the sponsorship of

350 Attend Agway Garden Spot Unit Second Annual Meeting

by Everett Newswanger
Staff Reporter

Newswanger

The manager of the local Garden Spot Unit of Agway Inc., told the members, patrons, employees and friends present at the annual meeting Tuesday evening, that since the merger of Agway and the Lancaster County Farm Bureau in July 1965, a real reduction in operating cost has been achieved. "We have reduced your investment in fixed assets by over ½ of a million dollars which means a real reduction in cost of interest because your stores pay 5½ percent interest for all of the money they are using," he said.

Charles C. Burkins told the 350 persons gathered in the auditorium of the Manheim Central Senior High School, "We have shown a reduction in money tied up in inventories by having less stores and we will be able to reduce our inventories quite a bit more during the present year."

"With a reduction of stores we have had a reduction of personnel. Last November, at your annual meeting, we reported that we had 104 employees right after the merger," Burkins said. "At mid-November of 1965, we had 79 employees and at the present time, we have 65."

"Our sales and various service incomes for the fiscal year amounted to $4,448,000 with feed, our major item, accounting for over 60 percent of sales," Burkins said.

Four committeemen were elected to three-year terms during the business meeting: Roy Book, Ronks R1; Amos H. Funk, Millersville R1; Henry Kettering, Lititz R3; and Noah Kreider Jr., Manheim.

Agway Inc. is owned by 95,000 farmers in 12 Northeastern states with total assets of 184 million dollars.

Egg Marketing Advisory Council Reorganizes

HARRISBURG — Allen Shade, Spring Glen, was named chairman of the state Egg Marketing Advisory Council for next year.

The upper Dauphin County poultry and egg processing plant operator succeeds Sam Berenson, Hanover, who was chairman for the Egg Council's first two years of operation.

The Council also elected Walter Wheelock, Chambersburg, as its vice president, succeeding Shade, and it chose John Landis, Harleysville, Bucks County, as secretary. Landis succeeds Kenneth Souders, Coatesville, who also served two terms.

Three new appointees were officially seated on the council. They are: Richard Feilbach, Northampton County; Irvin Musser, Mount Joy; and Nathan Werrin, Philadelphia.

Activities of the past two years were reviewed. To continue the progress made for the egg industry, the Council tentatively developed a series of plans and projects for 1967. Committees will report back at the next meeting in January, after which projects will be approved, and the next year's program will be finalized.

Council projects and industry activities helped turn the tide in gross income for egg producers, the market advisory group said. Both poultry and egg income has been increasing in the past two years for producers, even though retail prices have not fluctuated greatly.

L. L. Logan Honored By Pa. Flying Farmers

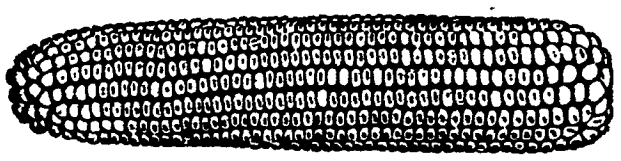
Mr. and Mrs. L L. Logan, 1204 Paoli Pike, West Chester, traveled in their own plane to University Park Airport last Saturday. They attended the November dinner meeting of the Pennsylvania Flying Farmers at Spring Mills, Penna.

Logan was presented an attache case in appreciation of his services to the organization during the past year by Ruth Wilson, Nottingham, Pa. Mrs. Wilson is Pennsylvania Flying Farmer Queen and immediate past International Flying Farmer Queen. Logan retired in August after having served as Director of International Flying Farmers for the past 10 years.

REMOVE LEAVES EARLY

Removing leaves as promptly as possible throughout the fall prevents your grass from smothering, says Jack Harper, extension lawn specialist. Instead of burning them, place them in a compost pile to use later as a source of organic matter for flowers and shrub beds.

Defective stoves and heaters, along with defective chimneys and sparks from chimneys, are responsible for almost half of all fires in farm dwellings, says the National Fire Protection Assn.



ALL-OUT YIELDERS!

Pioneer's New Generation hybrids make the most of today's corn growing advances

For 1967, Pioneer offers you a New Generation of hybrids — exceptional performers to fit your specific corn growing needs.

These varieties are especially suited to top-level farming — where high fertility, high populations, weed and insect control, and top-level management open the way to new yield goals. You can meet these needs with Pioneer's New Generation hybrids.

Supply of many of these top performers won't last long. So order now and get first call on the hybrids that can help you get all-out yields.

More Ways With Turkey

About halfway between cold roast turkey sandwiches and turkey soup comes interest in a recipe for a tasty hot creamed turkey dish. This cheese-rich turkey is excellent served over rice on plates from the kitchen or from a chafing dish at the dinner table. Whole cranberry sauce adds color and tartness. Celery sticks and carrot curls add the crunch to the menu. End with fruit cake and lemon sherbet.

SPENCE

CREAMY SEASONED TURKEY

- 3 cups cooked cubed turkey
- 1 10½-oz. can condensed cream of chicken soup
- 1 egg, slightly beaten
- ¼ cup milk
- 1 2-oz. can whole mushrooms
- 2 tablespoons chopped pimiento
- ¼ teaspoon celery salt
- ¼ teaspoon black pepper
- ⅛ teaspoon chili powder
- 1 cup shredded sharp Cheddar cheese
- 3 cups cooked rice

Blend together and heat soup, egg, and milk in a sauce-pan. Add all remaining ingredients except rice and blend well. Heat. Serve turkey over hot rice.

* * * * *

HOT TURKEY-CHEESE SANDWICH

- 2 pounds sliced cooked turkey light meat
- 1 loaf Sour Cream Dill Bread* sliced ½ inch thick
- 8 ounces sliced American or Cheddar cheese

Place sliced bread on a large piece of heavy-duty aluminum foil. Insert a slice of turkey roast and a slice of cheese between each slice of bread, retaining loaf shape. Wrap sandwich loaf in foil, folding edges drug store style. Heat in a hot oven (425 degrees) for 10 minutes or until cheese melts and bread is warm. Garnish platter with red spiced crab apples. Serve with crisp tossed salad and dessert.

***SOUR CREAM DILL BREAD**

- 1 ounce package yeast, compressed or dry
- ¼ cup warm water
- 1 cup dairy sour cream
- 1 tablespoon finely chopped onion
- 2 teaspoons dill weed
- 2 tablespoons sugar
- 1 tablespoon butter or margarine, softened
- ⅛ teaspoon baking soda
- 1 egg, slightly beaten

Soften yeast in warm water. In a large mixing bowl combine sour cream, onion, dill weed, sugar, softened butter, soda, egg, and softened yeast. Add one-half of flour and beat well. Add additional flour to form a stiff dough. Knead 5 to 10 times in bowl, cover, and let rise in warm place (50 to 60 minutes, or until double in size. Shape into 2 small loaves and place in greased 9x5x3 inch loaf pans. Let rise in warm place 30 to 40 minutes. Bake in a moderate oven (350 degrees) 40 to 45 minutes, or until golden brown. Remove from pans and place on cooling racks. Brush with melted butter and sprinkle generously with salt.

* * * *

TURKEY & CRAB STUFFED SQUASH ON THE HALF SHELL

- 3 medium acorn squash
- Salt
- ¼ cup butter
- 2 cups dairy sour cream
- 1 cup (7½-oz. can) diced crab meat
- 1½ cups diced, cooked or canned turkey
- 1 tablespoon tarragon vinegar
- ½ cup shredded Swiss cheese

Wash and cut squash in half lengthwise. Remove seeds and fibers. Place cut side down on baking sheet; bake 35-40 minutes in a 350 degree oven. Turn cut side up, sprinkle with salt and dot with butter. Continue baking 15-20 minutes, or until squash is tender. Meanwhile, place sour cream in saucepan and mix in crab meat, turkey and vinegar. Heat over low heat just to serving temperature. Fill squash halves with creamy crab and turkey mixture, sprinkle with

Here are some stuffing suggestions—

SAVORY BREAD STUFFING

3 tablespoons butter, margarine, or poultry fat
¾ cup chopped celery
3 tablespoons chopped parsley
2 tablespoons chopped onion
4 cups soft breadcrumbs
½ teaspoon savory seasoning
½ teaspoon salt
Pepper as desired

Melt fat in fry pan. Add celery, parsley, and onion. Cook until tender. Add fat and vegetables to breadcrumbs. Add seasonings. Mix lightly but well.

VARIATIONS:

Oyster Stuffing—Omit celery and reduce parsley and onion to 1 tablespoon each. Add ½ pint oysters, heated in their own liquid and drained.

Nut Stuffing — Omit parsley and savory seasonings and add ½ cup chopped nutmeats —pecans, roasted almonds, filberts, or cooked chestnuts.

Cornbread Stuffing — Omit bread crumbs and savory seasoning. Add 4 cups cornbread crumbs and ½ teaspoon thyme.

World food production for 1965-66 was about the same as for 1964-65, says the UN's Food and Agricultural Organization. However, during the period, world population rose about 70 million persons. The overall result is a two percent drop in per capita food production.

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

THOMAS

Overeating Versus Overweight

Doctors and nutritionists believe that overeating is the chief reason for the overweight problem in this country. Overeating is a habit that plaques scores of men, women, and teenagers. Overeating is often a personal problem

It is sometimes the result of boredom or loneliness.

Overeating is frequently due to discontent and frustration.

On occasion it has been traced to a feeling of insecurity

If you are overweight and would like to reduce, first ask yourself why do you overeat? When do you overeat? Is overeating your regular pattern or an occasional one?

Once you understand your overeating pattern is based on personal feeling, you're on your way to correcting it

Changing a long-established habit of overeating is not easy.

Unless you're serious about your weight problem, chances are the results of a reducing program won't be encouraging

When You Buy Men's, Boys' Clothes

The sizing system for men's and boys' clothes is not uniform. The system that is used is based on body measurements. When you shop for men's and boys' clothes . . .

Have these measurements handy . . . current weight, height, and body proportions

Measurements used are height, chest, waist, trouser inseam, arm length and circumference of head and neck.

Coats and jackets for men and boys are sized by height and chest measure

Trousers, slacks, shorts, and jeans are sized by waist measure and length of inseam

For best results, have your man or boy along on a shopping trip . garments should be tried on for fit, comfort, and appearance.

Buying Guides for Services

When you buy repair services on TV sets, autos, appliances, and equipment . . .

Look for repair shops with reputations for reliable service, well-trained technicians, and reasonable prices

Know essential facts about products — manufacturer's name, model number, date of purchase, dealer's name

Look into warranties issued at the time of purchase to see if repairs or parts are covered.

● SWCD

(Continued from Page 1)

senig, Lancaster County, said that in the important task of getting conservation on the land, the conservation directors themselves must be thoroughly sold on the practices and on the ultimate objective of such applied practices.

All panelists stressed the need for districts to analyze their problems, and to enlist the aid of all cooperating agencies and individuals in getting the job done.

State directors elected the following association officers for 1967: president, David Woods, Mercer County; 1st vice president, Lee Adamson, Washington County; 2nd vice president, Lester Crouse, Bucks County; secretary, Mrs. Sophie Westgate, Pike County; and treasurer, Byron Breisch, Schuylkill County.

William Voight, executive director of the Susquehanna River Basin Advisory Committee, spoke to the directors at a breakfast meeting.

Several state legislators, including Sherman Hill from Lancaster County, attended the two-day meeting

The Lancaster County SWCD will host next year's state conference which will be held November 8-10 at the Host Motel, Lancaster

● Baby Beef Show

(Continued from Page 1)

head, he said Steers not selected for the Farm Show will remain at the Yards for the district show the following day All Farm Show steers will be taken back home following Tuesday's roundup

The Southeast District Show will begin at 9 a m on Wednesday, followed by the sale of all animals at 1 p.m. Each club member should be present to show his own steer, the county agent said, adding that a special county showmanship contest will be held following Tuesday's roundup. The top showman will be awarded a Hereford steer calf.

In the final period before the roundup, Smith urged all beef club members to spend time with their animals every day. In addition to careful grooming, he advised a minimum daily walking period of one-half mile.

● Holstein Type

(Continued from Page 1)

The improved breed service is expected to have wider acceptance and practical application for all segments of the dairy industry: purebred breeders, commercial dairymen, educators and extension personnel, students of dairy husbandry and breeding, and especially within the A. I. ammal breeding industry.

Descriptive type classification continues to use the industry standard alphabetic designations for general appearance, dairy character, body and mammary, plus a final, or overall score

Beyond this, a practical description will be provided for each of 12 major parts of the cow considered to be of economic and genetic importance to the dairyman. This list covers stature, head, front end, back, rump, hind legs, feet and five parts of the mammary system. A single condition describing each of these parts will be assigned from a list of up to five graphic terms.

Primary worth of the improved program is to the breeder-dairyman who seeks to measure his progress in herd conformation, produce more saleable stock, select bulls for herd improvement and use more complete information in certain herd management operations.

● Vo.-Ag. Teachers

(Continued from Page 1)

jobs in all these areas, not farming alone. For this reason, more teachers are needed, many to teach in new areas.

Education in vocational agriculture is now open to any high school student who wants work experience in the agricultural field he intends to enter. A boy without farm land can enroll in vocational agriculture if he is interested in an agribusiness career.

Practical work experience is now available from part-time work in local businesses or in school plots and shops. However, supervision of the entire program is still the responsibility of the agriculture teacher; he must coordinate work experience with classroom instruction.

The new law gives new opportunities and additional responsibilities to prepare youth and adults for the many occupations in the broad and dynamic field of agriculture, Barwick points out. The need for vocational agriculture teachers is critical and it will continue.

FIVE YEARS AGO

(Continued from Page 8)

the Garden Spot High School vocational agriculture department.

* * * *

Ten Years Ago

November, 1956

Southeast Beef Roundup Ti-

heavyweight Angus named "Mickey the 3rd" won over 291 entries in Wednesday's (Nov. 7) Southeast District 4-H Club Baby Beef Roundup to win the grand champion title for owner Verna Landis, Lancaster R4.

Miss Landis, 17-year-old daughter of Mr. and Mrs. Roy Landis, scored over entries from Adams, Berks, Chester, Cumberland, Dauphin, Lancaster, Lebanon, Northampton, Perry, and York counties.

Runnerup in the hotly contested roundup was a Hereford entry shown by Jimmy Quisenberry, Jr., of Stewartstown R1. The ten-year-old lad from York County, in his first year of beef club work, handled his steer like a true champion.

* * * *

Broilers Hit 3-Year Low At 16.08 Cents — On the Lancaster Poultry Exchange Thursday (Nov. 1), average broiler prices dropped to a three-year-low at 16.08 cents. A year ago they averaged 18.54 cents.

* * * *

Mrs. Nolt Reelected Farm Women President — Mrs. E. Robert Nolt, Lancaster R1, started her second term this week as president of the Lancaster County Society of Farm Women. She is a member of Society No. 4.

Others named at the all-day meeting held at Manheim Twp High School were. Mrs. Harold Zook, secretary; Mrs. Paul Ebersole, treasurer Named to two-year terms were Mrs Elam Buckwalter, 1st vice president; Mrs Abram Weidman, 2nd vice president.

Eby Elected County Holstein Head — Donald S. Eby, Gordonville R1, was named president of the Lancaster County Holstein-Friesian Association Tuesday night. He had served previously as vice president

Approximately 250 persons attended the association's 6th annual banquet meeting held Tuesday night at the Leola Memorial Building.

Others elected were: J. Robert Hess, Strasburg R1, vice president; Everett E. Benjamin, Holtwood R2, treasurer. Henry H. Hackman, Manheim R2, was reelected secretary.

Eby succeeds Elvin Hess, Jr., Strasburg R1, who was cited for his long record of active service to the county association.

* * * *

Hoffer, New County FFA President — Dean Hoffer, a senior at Manheim Central High School, and president of the Manheim Future Farmers of America Chapter, was elected Wednesday night (Nov. 7) to lead the County FFA Chapter for 1957.

He is the son of Mr. and Mrs. Arthur H Hoffer of Manheim R3.

Other county officers elected were. vice president, Charles Rohrer, Pequea Valley; secretary, Marvin Bennetch, Cocalico, treasurer, Robert Book, Lampeter-Strasburg; reporter, Marion Findley, Solanco; sentinel, Melvin Martin, Manheim Central, and chaplain, Robert Good, Cocalico

Milk Hearings To Reconvene On Handler Pool — Inter-State Milk Producers' Cooperative will again vigorously contest a proposal to change the Philadelphia milkshed's traditional handler pool system to a marketwide pool, a co-op spokesman said this week (Nov 9). The federal-state joint hearing to revise Order 61 reopens in Philadelphia on Tuesday (Nov 13).

The market pool proposal has been made by I. Elkin Nathans, a New York milk broker, and is supported by a large New York federation of producers, and by two large Philadelphia producers.

Inter-State contends that adoption of a market pool system would lower the blend price to area producers, and would probably increase the milk price to consumers. The hearing, which has been in session during the summer, was recessed on August 22

* * * *

Guernsey Men Elect Stoltzfus — Melvin R Stoltzfus, Ronks R1, was elected president of the Lancaster County Guernsey Breeders Association Friday night (Nov. 23) at a director's meeting at the home of Raymond Rohrer, Lancaster R7 He succeeds Raymond F. Witmer, Willow Street R1

Other officers are vice president, Robert McSparran, Peach Bottom, secretary-treasurer, Frank Hershey, Lancaster R5 Harry S Mumma, Manheim R1, was named delegate to the Red Rose Dairy Herd Improvement Association

Don't Drop Out of High School

Young men who wish to become successful farm managers will have to be able to solve problems far more difficult than their fathers and grandfathers experienced, says Jesse G Cooper, extension farm management specialist at Penn State University More people managing our larger farms have college degrees, and many of them take time off to return to school and attend short courses

Crop Roundup

FALL FEED SITUATION BELOW NORMAL IN PA.

Rainfall during October was nearly normal and temperatures above normal, but these did little to ease the feed shortage resulting from the fifth consecutive drought year in Pennsylvania, according to the Pennsylvania Crop Reporting Service. The corn crop had already progressed too far for much benefit. Hay and pastures made satisfactory growth and supplied some feed, but the overall feed shortage is large enough that these had little affect.

CORN

The 1966 corn crop in Pennsylvania was the poorest for many years. The situation was quite spotted and there were some high yields both for grain and silage Most producers had short crops and many silos are not full Considerable acreage intended for grain was diverted to silage, and much of the silage intended for winter feed has already been fed. Many farmers report selling livestock to fit their feed supplies, some have sold their entire herds.

SMALL GRAINS

Small grains to be wintered over had another month of favorable growing conditions. Farmers had some difficulty getting winter grains in First it was too dry and then too wet, but planting intentions were accomplished

HAY AND PASTURE

Hay and pasture crops made continued good growth during October. Some farmers tried to make a little late hay, but had poor weather for curing Most of the late hay and forage crops were green chopped, or pastured, to ease the drain on winter feed supplies.

POTATOES

Potato digging was nearly completed in Pennsylvania during October except in the southeast. Harvest progressed slowly due to wet weather and labor shortages Yield of the fall crop is estimated at 165 cwt. per acre compared with 200 cwt per acre in 1965 and a 5-year (1960-64) average of 191 cwt.

U. S. GENERAL CROP REPORT

Total prospective output of 1966 crops in the nation showed little change from October 1 Lowered prospects for cotton, tobacco, and sweet potatoes were nearly offset by slight increases for corn, soybeans, sorghum grain, rice, peanuts, potatoes, dry beans, and sugarbeets. October was generally cool and dry. However, crops dried slowly and harvest progress is lagging over the eastern half of the nation.

Tonnage of the four feed grains is now expected to total 159 million tons — 1 million more than last month's estimate and 1 percent less than the 1965 record production. Prospects for corn increased nearly one percent from a month earlier. Most of the increase was in West North Central States where yields are turning out better than expected earlier. Corn production is expected to be the second highest of record. Prospects for sorghum grain also improved in October; output is expected at a record high.

Winter wheat seeding progressed rapidly during October, and was virtually complete in the Central Plains by the end of the month. Most of the wheat has emerged and early seedings show good stands. However, dry weather and wind erosion caused some spotty stands in late seeded fields.

Area Firms Plan Beef Conference Here Dec. 8th

A beef conference, featuring talks of interest to beef cattlemen, will be held at the Sale Pavilion at the Lancaster Stock Yards on Thursday, December 8, it was announced this week.

The venture will be under the combined sponsorship of three area firms: Lancaster Livestock Exchange, Reynolds & Company, and John W. Eshelman & Sons.

The program will feature discussions on stock yards and terminal markets, the latest in beef cattle feeding and management, and will be keynoted by a talk on cattle futures.

One of the highlights of the program will be a panel discussion on trading cattle futures, followed by a question-answer period.

The sponsoring firms announced that all interested cattlemen are invited, adding that door prizes will be awarded and refreshments served

Deer Nutrition Study Evaluates Food Supply

Physical condition of white-tailed deer reflect the food supply of the area, experiments at Penn State University indicate. The most recent findings, by graduate students James B. Whelan and Jan E. Riffe, show that captive females (does) on well-balanced rations produce more fawns than wild does of the same age.

In nutrition experiments at Penn State, all does produced fawns. Of 951 wild does examined by the Pennsylvania Game Commission, 90 percent were carrying fawns.

Moreover, losses of fawns in the wild may amount to 40 percent or more, the research team reports, due to nutritional deficiencies in does and fawns in oversized herds on overbrowsed ranges.

Average weights of deer on good versus poor quality range show the effect of nutrition, Whelan and Riffe pointed out in a recent article in "Science for the Farmer," the quarterly publication of the Agricultural Experiment Station at Penn State Females two to four years old, fed well-balanced rations, weighed an average of 134 pounds in the Fall Wild does of the same age average about 98 pounds

From their experiments, Whelan and Riffe find that 100 well-fed does produce about 190 fawns. Game Commission figures from 1960 to 1965, they say, show that five counties in the extreme northwest averaged 198 fawns per 100 females In five northcentral counties, the comparative figures were 151 fawns for 100 does. In five northeastern counties the figures were 162 fawns for 100 does

They point out a fact known to many hunters, that antler development among bucks also reflects the quality and quantity of browse on a deer range Low body weight and poor antler development, especially among yearling bucks, indicate poorly fed deer

OCT. EGG PRODUCTION UNCHANGED FROM 1965

Following the fall seasonal pattern, egg production for Pennsylvania increased during October, according to the Pennsylvania Crop Reporting Service Pennsylvania egg production of 255 million eggs increased 1 percent from September, but was about the same as a year ago

The number of layers in Pennsylvania flocks during October increased 1 percent from September In comparison with October last year there were 3 percent fewer layers in flocks

The average price received for all eggs in mid-October was 45 cents per dozen, a cent less than the September price but 6 cents more than the October 1965 price

STORAGE STOCKS DOWN

Stocks of all types of eggs in cold storage on September 30, 1966 in the United States totaled 1,433,000 cases This is 9 percent less than a month earlier, 47 percent less than September 30, 1965, and 52 percent less than the 1960-64 average for the date

Borazon, a material invented in 1957, is the only known substance hard enough to scratch a diamond.
